PHILADELPHIA, AUG. 17, 1926.

THE NEW STAINING ACT: The amendment to the Federal Seed Act requiring the staining of imported alfalfa and red clover seed became effective July 26th. This amendment requires that red clover and alfalfa seed originating in France or other foreign countries (excepting Canada) shall be colored green, excepting that red clover and alfalfa seed from any foreign country, not adapted for general agricultural use in the U. S., shall be stained a red color. Clover and alfalfa originating in Canada will be stained iridescent violet.

CROP CONDITIONS: At this season we receive daily reports by mail and wire from the growing sections and are glad to pass along to our customers this information as it comes to us. Please feel at liberty to write or telephone us at any time regarding the latest reports on items of interest to you.

TIMOTHY: Improved conditions have resulted in a larger yield per acre than was anticipated and some sections report very good outturn. Other sections have not been so well favored and we note a great variation in quotations from different sections of the producing territory. Even in those sections which have a good yield there is general reluctance on the farmers' part to sell at prevailing values. In most sections the farmers seem disposed to hold their crop in anticipation of higher prices.

On account of likelihood of considerable fluctuations in price during the next few weeks we request that you telephone or wire us for latest values.

ALFALFA: Heavy demand, especially for certified seed. The farmer has learned the importance of buying alfalfa of known origin and we may expect to see with increasing certainty seed of known origin, carefully recleaned to meet his requirements.

RED CLOVER: The interest of the trade in red clover seed is concerned chiefly with the effects of the

operation of the new Staining Act referred to above. No one can say with any certainty what the results of the operation of the Act will be, but we shall be glad to give any information we may have to our friends who may be interested in discussing the matter with us.

ALSYKE: New Crop is coming on the market very slowly with early arrivals commanding a premium. We have new crop in stock; note quotations.

CRIMSON AND HAIRY VETCH: Demand poor; very likely due to high prices.

SEED GRAINS: Kindly note quotations on various seed grains required for Fall sowing.

GRASSES: One and lower values prevailing should result in increased demand for this grass. Red Top crop is reported short although perhaps a trifle larger than last year. Our Stocks Ky. Bluegrass and Red Top are new crop.

Prices quoted below are to-day's values f. o. b. Philadelphia. Samples sent promptly upon request. Bags not returnable
